SUMMARY

Motivated and detail-oriented Computer Science graduate with a strong foundation in software development, artificial intelligence, and modern web technologies. Adept at building scalable, user-focused applications and solving complex problems through clean, efficient code. A collaborative team player with a passion for continuous learning and delivering impactful solutions in fast-paced environments.

EDUCATION

Bahria University Islamabad

Bachelor of Science in Computer Science

Islamabad, Pakistan

Sep. 2022 – Jun. 2026

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, Software Design and Analysis, Database Systems, Web Programming, Generative AI, Artificial Intelligence, Cloud Computing

EXPERIENCE

Project-Based Web Developer

SHARCUT

Nov. 2024 – Feb. 2025

Islamabad, Pakistan

- Developed and maintained responsive web applications, contributing to improved user experience and performance.
- Collaborated closely with design and backend teams to implement modern, scalable front-end solutions using HTML, CSS, JavaScript, React, PHP, and other relevant technologies.

Web Development Intern

Smart-IS

Aug. 2024 – Sep. 2024

Rawalpindi, Pakistan

- Worked both independently and collaboratively in a professional team environment, demonstrating strong work ethic and adaptability.
- Built projects using React.js with Material UI for the frontend and SQL for backend data management.

PROJECTS

AI-Powered Notes Digitizer(FYP) | *React.js, Node.js, FastAPI, Python, MongoDB, LLaMA 3, FAISS*

- Developed a system to convert handwritten notes, scanned PDFs, and lecture audio into organized digital content using OCR and AI technologies.
- Implemented features including summarization, quizzes, flashcards, and searchable notes, and a chatbot-based interface to enhance student learning experience.

AI Resume Builder | *Python, MongoDB, Express.js, React, Node.js*

- Developed an AI-powered resume builder featuring an AI assistant that helps users generate tailored resumes with live previews and PDF export functionality.

AI Chat with PDF | *Python, Hugging Face, Transformers*

- Built an AI-powered PDF chat system enabling users to upload documents and interact with an AI to extract and retrieve relevant information.
- Implemented dynamic summary generation with variable output lengths based on user preferences.

AI Chatbot for Car Recommendations | *Python, Hugging Face, Flan-T5*

- Developed an intelligent chatbot trained on Flan-T5 to recommend cars based on user preferences such as budget, brand, fuel type, and features.
- Integrated NLP to understand natural language input and leveraged ML algorithms to deliver personalized, conversational responses that improve over time.

Algorithm Visualizer | *C++, Raylib*

- Built a graphical tool providing step-by-step visual representations of various Data Structures and Algorithms, aiding in intuitive understanding of algorithmic processes.

TECHNICAL SKILLS

Generative AI: Python, LLaMA, LLaMA-CPP, LLM Fine-Tuning, RAG, Chatbots

Web Development: MERN Stack, JavaScript, TypeScript, SQL, Git, RESTful APIs

App Development: Flutter, Node.js, Android Studio, Firebase

Cloud Computing: AWS, Azure, VM Setup & Management

PUBLICATIONS

Journal Article | *Under Review*

2026

- **Dr. Kabeer Bhatti, Dr. Muhammad Asif, Faris Ahmad Nasir, Mohammad Owais.** “DigitAI Notes: An AI-Powered Multi-Modal Notes Digitizer Integrating OCR, Speech-to-Text, and Large Language Models for Intelligent Study Material Generation.” *Acta Polytechnica Hungarica – Journal of Applied Sciences*, Obuda University, Hungary. Submitted, under review.

Dataset | *Kaggle*

2026

- **Faris Ahmad Nasir.** “IAM Handwritten Form Dataset with JSON File” – A dataset of handwritten images with per-image descriptions, file paths, and extracted text compiled in a structured JSON file. Published on Kaggle.

AWARDS & HONORS

1st Place – DSA Project Competition | *Bahria University*

2023

- Awarded first position in the Data Structures & Algorithms project competition at Bahria University.

2nd Place – DLD Project Competition | *Bahria University*

2023

- Awarded second position in the Digital Logic Design project competition we build a binary and 4-digit digital calculator using ICs and 7-segment displays for decimal output, with 8 LEDs (arranged in two 4-LED pairs) for binary result visualization.

Hacktoberfest | *Open Source Contribution*

2023

- Successfully completed the Hacktoberfest coding challenge, contributing to open-source projects and demonstrating software development achievements.
